## (54) DRESS HANGER FOR CHAIR

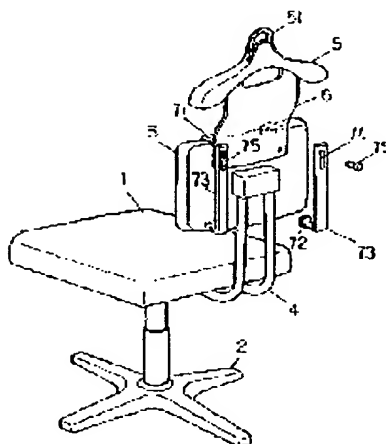

## (57) Abstract:

**PURPOSE:** To provide a dress hanger which does not disturb the use of a chair by loading the dress hanger on the seat back or pole of an office chair.

**CONSTITUTION:** A hanger main body 5 is formed in shape nearly same as that of an ordinary dress hanger, and a loading plate 6 is mounted under the hanger main body 5, and moreover, a pair of upper and lower gripping claws 71, 72 are mounted on the loading plate confronting with each other. The loading plate 6 is mounted on a seat back 3 of the office chair by holding the upper and lower edges of the seat back 3 of the office chair between the upper gripping claw 71 and the lower gripping claw 72, then, the dress hanger is loaded on the seat back 3. For example, the loading plate 6 is formed integrally with the gripping claw 71, and the gripping claw 72 is formed integrally with a connecting band 73. A joint hole 74 is pierced through a part in which the upper part of the band 73 is superimposed on the lower part of the loading plate 6. While, a screw hole is formed on the loading plate 6,

which presses the gripping claw 72 on the lower edge of the seat back 3, and the band 73 is connected to the loading plate 6 by screwing a joint screw 75, then, the seat back 3 can be held between the gripping claws 71, 72.
